Founded in 2014, the ATS was born from a social initiative, a vision of Senegalese realities, validated by the Fondation de France. It is a specialised company in sustainable development based around the retirement of workers in general in both professional and labour industries. The group's representative Becaye Guindo was forthcoming with his insights into the areas the firm specialises in and the work they engaged in which allowed them to win this award.

We specialise in the retirement of workers by offering three different packages. The ATS intends to give employees the right to freely choose one that suits them best. The variety of options is strengthened by collaboration with reliable partners, especially those working in the tourism sector. Insurance of Senegal Workers also works closely with local and international performances. This financial institution is primarily distinguished by its special consideration of Senegalese who work without being reported, yet a taboo subject before.

The policy of the ATS is marked by our innovative methods. Thus we aim to open our services to all workers in Senegal. For this, we also offer insurance deals for those working without being declared. The consideration of this type of work was previously a question that did not interest many people.

Senegal Workers Insurance offers three different packages. Each employee can make his choice and reflect on the one that suits him best. The first is the ATS pack. The insured pay ATS 15,000 CFA Fr per month. In all, there will be a pension insurance in the amount of 100,000 CFA Fr. The amount of the contribution is thus 15% of the amount collected for retirement. This contribution of FCFA 15,000 is still to be paid after retirement, but the monthly amount collected will then be 85,000 FCFA. Then there is the social pack. The amount of the fee is 30,000 CFA francs per month for a pension 100 000 FCFA.

After retirement, the amount of the contribution does not change. But the amount collected monthly drops to 70,000 FCFA. The last pack, said retired pack allows you to choose the amount to be paid monthly, that is to say, precisely between 4000 and 10 000 FCFA. Obviously, the amount collected will then be determined by that of the contribution paid. In sum, the Workers' Insurance Senegal intends obviously attract the attention of entrepreneurs in Senegal, and especially that of their employees.
